SYMBO • STAMP

- saves drafting time and money
- makes clean, sharp prints that meet required standards
- gives desired detail in your drawings
- allows for exact positioning of symbols, titles and illustrations on your drawings
- provides a system for standardizing all company drawings

Not a template... not a stick-on... not a transfer

SYMBO • STAMP is a patented, totally transparent printing instrument which allows the draftsman to print repetitive symbols, illustrations and partial illustrations in precisely the position you want.

SYMBO • STAMP is composed of two transparent plastic materials — one relatively soft (the printing surface), the other relatively hard (the mounting block) — held together by a transparent adhesive. Every print made with **SYMBO • STAMP** is sharp, accurate and completely opaque for reproduction by any processing including microfilming. **SYMBO • STAMPS** are used with a specially designed inking surface which allows the ink to touch only the printing surface, thus maintaining the transparent feature. Specially formulated inks dry instantly on both porous and non-porous surfaces. Drafting instruments may be used on a fresh imprint immediately after making it. Erasures can be made on both porous and non-porous materials.

SYMBO • STAMPS are sold in two basic categories.

Stock SYMBO • STAMPS: Any symbol which appears in MILstd, ASA or JIC* catalogues, plus other stock **SYMBO • STAMPS** listed as such by the SYMBO Company, can be ordered directly from stock.

Custom SYMBO • STAMPS: Any symbol, illustration, or title up to 36 square inches, can be produced from artwork regardless of complexity. You can have your own system of **SYMBO • STAMPS** for maximum graphic communication from one office to another.

* U.S. Military Standards, American Standards Association, Joint Industry Council

a transparent stamp for imprinting on drawings *whatever you want...wherever you want*

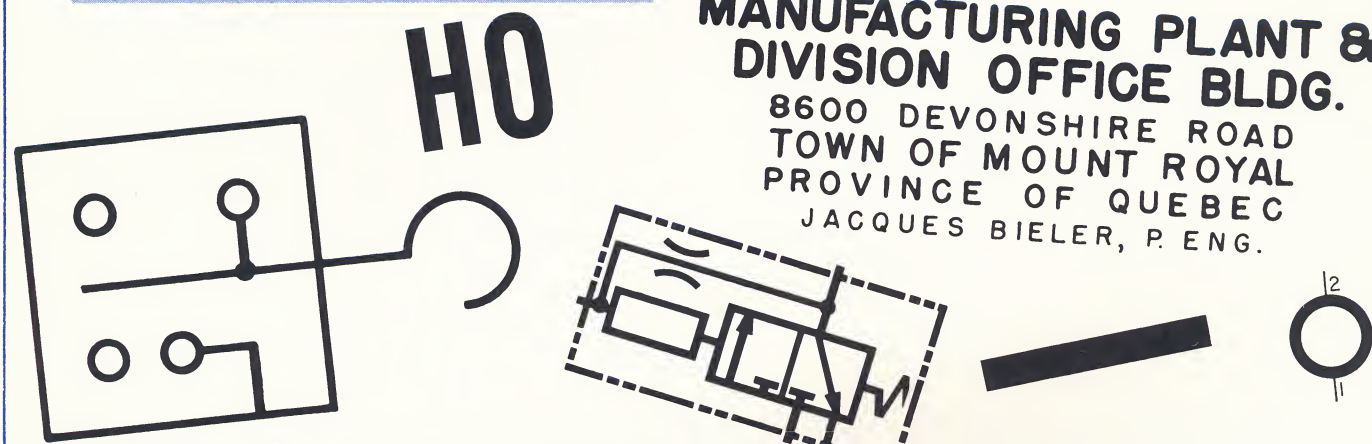

HERE'S INSTANT ARTWORK AT YOUR FINGERTIPS

- Perfect "See-through" registry
- Produces clean, sharp artwork
- Wear-resistant printing surface is good for thousands of impressions
- No inventory-maintenance problems
- Artwork is imprinted directly on the working surface of your drawing — no need to flip the sheet
- Nothing to loosen or peel off in the rollers of reproduction machines
- Makes prints as opaque as drafting ink — reproduces perfectly from any paper or surface
- Consistent line weight is produced automatically
- Applies up to 36 square inches of artwork at one time
- No detail is too fine — even reproduces halftone illustrative materials
- Printing surface can be masked off to apply any portion of the image
- Dries immediately on any surface
- Can be used on porous or non-porous surfaces
- Clean to handle
- Easy to store
- Low original cost — in repetitive use it pays for itself in no time
- Easy, low cost way to keep your symbols up-to-date

HEAVY LINE

You can produce heavy, opaque lines with consistent line weight to meet government microfilming standards for reliability in reduction. Large opaque surface areas enhance designs and other art elements.

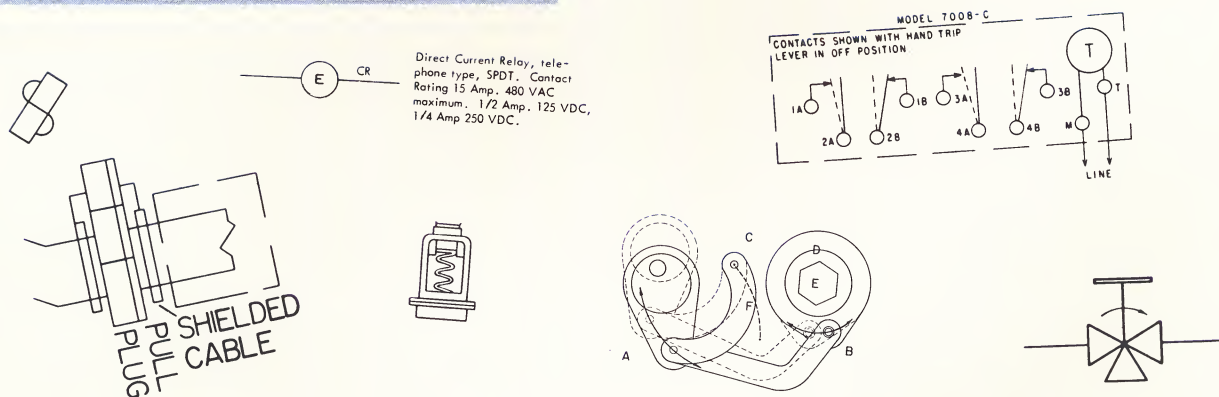

MANUFACTURING PLANT & DIVISION OFFICE BLDG.

8600 DEVONSHIRE ROAD
TOWN OF MOUNT ROYAL
PROVINCE OF QUEBEC
JACQUES BIELER, P. ENG.

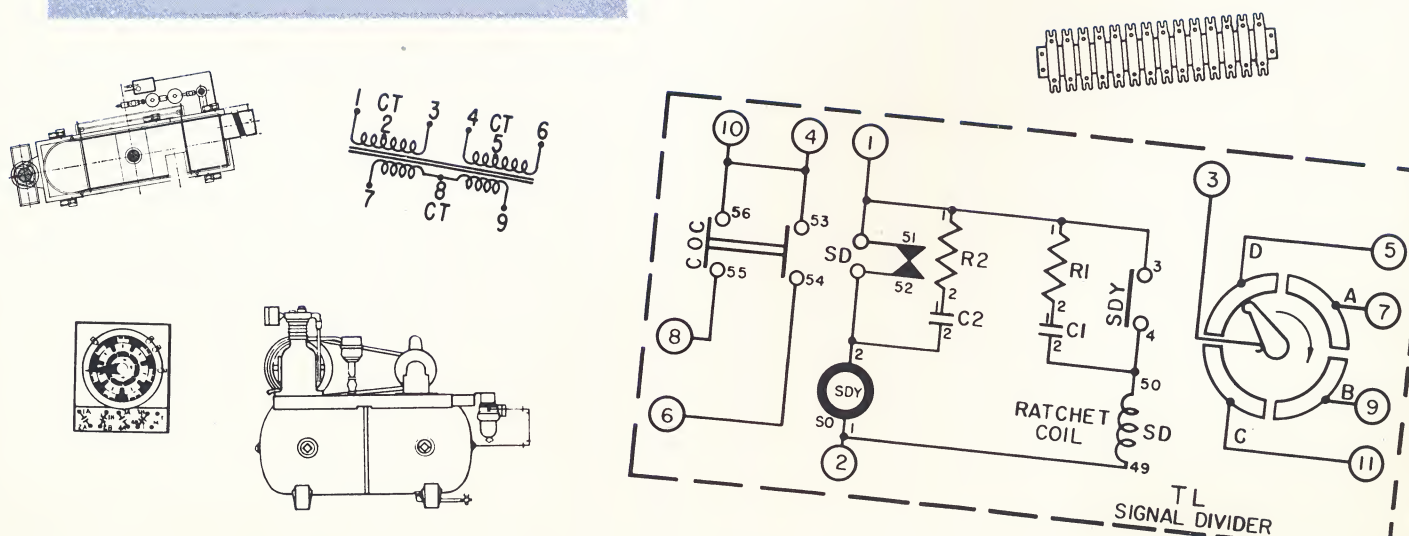

LIGHT LINE

You can get SYMBO•STAMPS with lines as light as you want so that they meet the regular line weight of your drawings and have the appearance of actually being drawn rather than printed.

FINE DETAIL

You can reproduce textures, patterns, alphabets, extremely fine material . . . extra detail which you couldn't afford to draw (and which is particularly effective in producing neat, comprehensive sales proposals).

LARGE SIZES

SYMBO•STAMPS up to 36 square inches can slash drafting time when standard units such as title blocks, detail drawings or partial schematics are repeated . . . even when they repeat as little as two or three times.

SMALL SIZES

Small elements that repeat hundreds of times can be printed quickly rather than tediously drawn. Symbols which are difficult to draw because of their minute size can be printed cleanly and crisply with SYMBO•STAMPS.

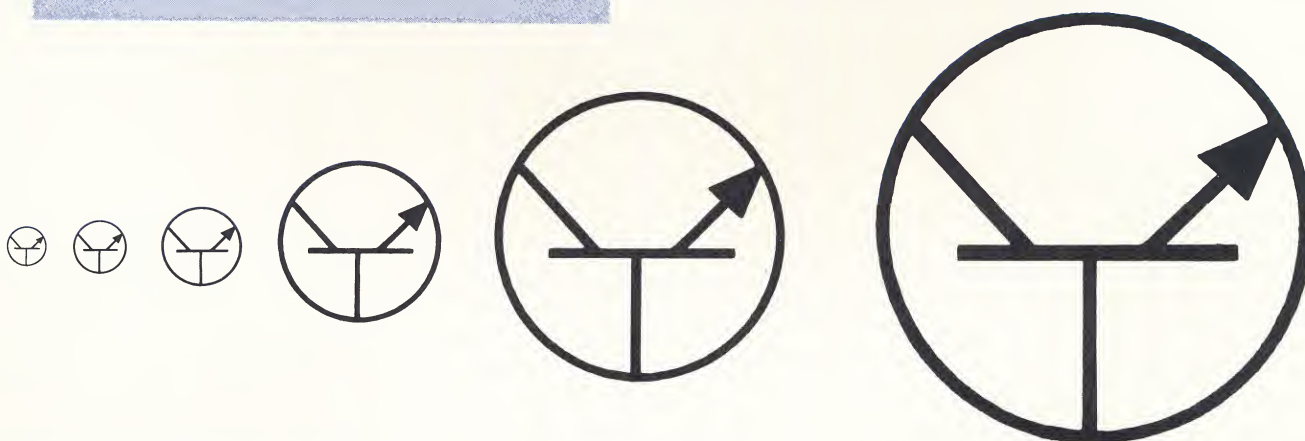

HIGH OPACITY

Fine or heavy weight lines made by SYMBO•STAMPS can be copied by any means on any machine to give you clean, sharp reproductions without ghosting. Images are permanent . . . but they can be eradicated or erased cleanly.

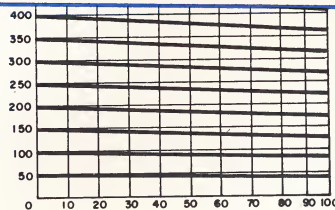

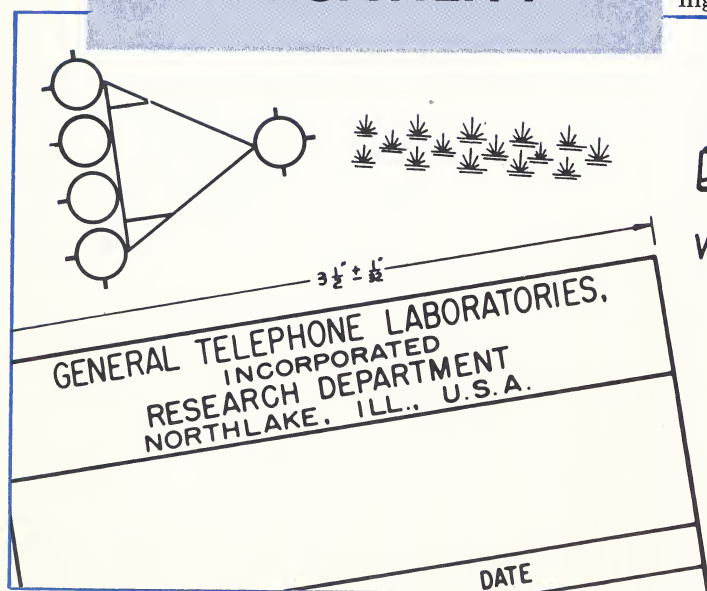

ANY SCALE

Whether you work to government scale or to other accepted standard scales, SYMBO•STAMPS can produce the clean, sharp prints you want. One piece of artwork submitted in the largest scale can give you SYMBO•STAMPS in any size.

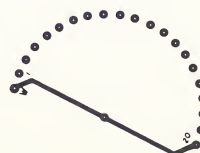

VERSATILITY

Any detail may be masked off to allow only the desired portion of the SYMBO•STAMP to print on the drawing. This also permits portions or complete stamps to be combined for building various arrangements of standard components.

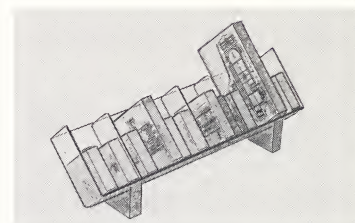

WIRING SAME AS UNIT NO.
EXCEPT AS SHOWN

SYMBO • STAMP

EASY TO USE Simply tap the SYMBO • STAMP on the SYMBO • PAD to apply a controlled amount of fast drying ink to the printing surface of the stamp. Grasp the SYMBO • STAMP with the thumb and index finger of both hands. Align and position the printing surface over your drawing. Place it down with light, even pressure and you will leave a perfect print when the SYMBO • STAMP is drawn away.

EASY TO STORE The SYMBO Company provides a unique storage system designed especially to keep your SYMBO • STAMPS handy and easy to use. The SYMBO • RACK is a clear plastic shelf with a "V" shaped deck that holds the stamps securely. . . . The rack may be mounted on the wall, on the drawing board or in any convenient nearby location. Any number of racks may be combined to provide the amount of storage required.

EASY TO MAINTAIN SYMBO • STAMPS produce thousands of clean, crisp impressions with practically no care at all. Simply wipe the printing surface lightly over any clean scrap of paper after making each print. This removes excess ink so that the stamp is clean and ready to make the next print whenever it is needed. Should any ink build up, it is easily removed with alcohol.

EASY TO ORDER AND RE-ORDER Simply send us the artwork you want reproduced, indicating the reduction you desire. Or we will even do the finished art from your pencil sketch if you wish. Standard symbols are available as listed below. In all cases, we are happy to submit quotations whenever you request them.

STOCK SYMBO • STAMPS Any MILstd, ASA or JIC standard symbol may be ordered by calling out the current source, catalogue number and symbol number. These stock SYMBO • STAMPS are exact reproductions of the published symbols. Other stock SYMBO • STAMPS are published by The SYMBO Company.

CUSTOM SYMBO • STAMPS SYMBO • STAMPS can be made from any drawing up to 36 square inches, regardless of complexity. Generally, stamps should not exceed 8 inches in any one direction. For extremely fine detail, it is desirable to do original artwork 2 or 3 times the size of the desired SYMBO • STAMP. Clean, crisp artwork same size, however, will be satisfactory. All artwork should be a solid black on a white surface.

SYMBO • PADS SYMBO • PADS are available in three sizes with inks for use on either porous or non-porous surfaces.

SYMBO • RACKS SYMBO • RACKS are made of clear plastic in a standard length which permits combining as many units as needed. Each unit holds from 12 to 24 SYMBO • STAMPS, depending upon the size on the stamps.

HOW TO ORDER SYMBO STAMPS

STOCK SYMBO STAMPS: If a Symbo Stamp is one from a published Symbo Company booklet (to be issued from time to time), then it is regarded as a Stock stamp. Order by Stamp Number and Price in booklet.

CUSTOM SYMBO STAMPS: If a Symbo Stamp has not been published by the Symbo Company but has been made for you previously, follow Steps I, II and III when ordering. If a Symbo Stamp is to be made for the first time, follow Steps I, II, III and IV.

STEP I: Determine the Symbo Stamp you want. If you **have** ordered it before, give us your previous order number, an imprint of the stamp or our Symbo Stamp number. If you **have not** ordered the stamp before, supply us with proper artwork (See Artwork instructions on back page).

STEP II: Determine the Size of the Symbo Stamp. Multiply the greatest horizontal inch dimension by the greatest vertical inch dimension of the final size of the imprint. You will have the square inch measurement of your stamp.

STEP III: Determine the List Price of the Symbo Stamp. Using your square inch measurement, price each stamp as follows:

1 sq. in. or less (with no dimension greater than 1")	\$ 2.00
2 sq. in. or less (with no dimension greater than 2")	3.00
4 sq. in. or less (with no dimension greater than 4")	4.00
8 sq. in. or less (with no dimension greater than 6")	6.00
16 sq. in. or less (with no dimension greater than 8")	9.00
24 sq. in. or less (with no dimension greater than 8")	12.00
36 sq. in. or less (with no dimension greater than 8")	15.00

STEP IV: Determine the Make-Up charge for your new stamp*. If your stamp is being made for the first time, use the square inch measurement and this table for make-up charges:

Up to 1 sq. in.	\$ 2.00
Over 1 to 2 sq. in.	4.00
Over 2 to 4 sq. in.	6.00
Over 4 to 8 sq. in.	8.00
Over 8 to 16 sq. in.	10.00
Over 16 to 24 sq. in.	13.00
Over 24 to 36 sq. in.	16.00

***Note:** More than one Custom Symbo Stamp can be included to arrive at the total square inches for the make-up charge with each stamp counting for at least 1 sq. in. For instance, 3 stamps of 2 sq. in. each would total 6 sq. in. and the make-up charge would be \$8.00 (over 4 to 8 sq. in.). Make-up charges are in addition to list prices.

ARTWORK: A finished stamp can be no better than the original artwork. The artwork furnished should be done with black ink or sharply defined jet-black pencil on white stock, vellum or film, and should be in one of 3 scales: same size, two times or three times the size of the finished stamp. If a scale larger than 1:1 is used, be sure you allow for reduction in the weight of the lines in the drawing. We will do the artwork for you on your request at the rate of \$7.50 per hour. Supply us with a 1:1 sketch of your requirements along with your authorization.

QUANTITY DISCOUNTS: To arrive at the total quantity, all Symbo Stamps count toward the total on one order. These discounts do not apply against make-up charges, artwork costs or Symbo Pad and Symbo Rack prices.

1 - 11 Stamps per order.....	List Price
12 - 23 Stamps per order.....	10% Discount from List Price
24 - 47 Stamps per order.....	15% Discount from List Price
48 - 99 Stamps per order.....	20% Discount from List Price
100 or More Stamps per order.....	25% Discount from List Price

Note: Where stamps are to be used in quantity within Corporate systems, special quotations are available.

HOW TO ORDER SYMBO PADS

(Do not use ink pads other than Symbo Pads)

Two types of Symbo ink pads are available:

Ribbon type — for use with porous surfaces, such as vellum or sulphite paper.

Balsa-wood type (with ink) — for use with non-porous surfaces, such as plastics, films, drafting cloths and metals.

Size 2" x 3" (Ribbon or Balsa, state which).....	\$4.00
3" x 4" (Ribbon or Balsa, state which).....	5.00
4" x 7" (Ribbon or Balsa, state which).....	7.00

HOW TO ORDER SYMBO RACKS

One size of partitioned plastic rack is available. It will hold any size of stamp except very large ones. 12 nominal or 24 small size stamps can be stored in one rack. Each \$5.00

CONDITIONS OF SALE

1. Minimum order is \$12.00 net.
2. All prices and terms are subject to change without notice.
3. Delivery is prepaid.
4. Payment terms net 30 days to established accounts.
5. Delivery 10 days or less from receipt of order.
6. Satisfaction guaranteed or your money back.
